

MUNEEB-UR-REHMAN

FRONTEND DEVELOPER & DEVOPS INTERN

Faisalabad, Punjab, Pakistan | +92 300 6657269 | muneebur-rehman.vercel.app | linkedin.com/in/muneeb-tariq-6ba338361/

PROFESSIONAL SUMMARY

Dynamic and detail-oriented Frontend Developer and DevOps Intern with a strong foundation in building responsive web applications and supporting modern deployment workflows. Experienced in developing user interfaces with React.js and Vue.js while assisting with Linux system administration, monitoring, and CI/CD practices. Currently expanding expertise in Machine Learning (ML) alongside frontend engineering and DevOps to build intelligent, scalable, and high-performance software solutions. Passionate about continuous learning, problem-solving, and delivering reliable applications through modern development practices.

TECHNICAL SKILLS

Frontend Development: React.js, Vue.js, JavaScript (Intermediate), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Vite, React Router, Framer Motion, Lenis, EmailJS

Backend & Databases: Flask, PHP, Express.js (Basic), Node.js (Basic), MySQL

DevOps & Automation: Linux (Ubuntu, Zorin OS, Kali Linux, Parrot OS), GitHub Actions, CI/CD Pipelines, Linux System Monitoring, Basic Automation

Tools & Deployment: Git, GitHub, VS Code, Cursor, PyCharm, npm, Postman, XAMPP, Figma, Netlify, Vercel, GitHub Pages

PROFESSIONAL EXPERIENCE

DEVOPS INTERN | DEVHOUSE FSD

2026–Present

- **System Monitoring & Health:** Proactively monitor system health metrics and perform routine system scanning to ensure high availability and optimal performance across Linux-based environments.
- **Automation & Scripting:** Assist in building and deploying basic automation tasks to streamline repetitive operational workflows and reduce manual overhead.
- **CI/CD Implementation:** Support CI/CD workflows and deployment pipelines using GitHub Actions, ensuring smooth and reliable code integration to Netlify, Vercel, and GitHub Pages.
- **Environment Administration:** Maintain and configure Linux server environments (Ubuntu), troubleshooting basic configuration issues alongside the development team.

PROJECTS

LINOPS TOOLKIT

Technologies: Linux, Bash Scripting, Python, Git

Developed a specialized suite of system administration and monitoring tools designed to streamline Linux performance tracking and basic automation tasks. **Key Achievement:** Integrated system health checks that automatically log memory usage, CPU utilization, and open network ports, reducing manual diagnostic time.

INSTITUTE MANAGEMENT SYSTEM (TEAM PROJECT)

Technologies: React.js, Tailwind CSS, PHP, MySQL, Git

Collaborated with a development team to engineer a comprehensive management platform handling student records, course scheduling, and administrative operations. **Key Achievement:** Contributed to project planning, market research, project supervision, and frontend implementation while utilizing React Router for seamless navigation and improving database efficiency.

PERSONAL PORTFOLIO

Technologies: React.js, Vite, Tailwind CSS, Framer Motion, Lenis, EmailJS

Designed and deployed a highly interactive, responsive portfolio website to showcase technical projects and frontend development expertise. **Key Achievement:** Implemented smooth scrolling, responsive animations, SEO optimization, and modern UI interactions while achieving excellent Lighthouse performance.

PYTHON VOICE ASSISTANT

Technologies: Python, SpeechRecognition, pyttsx3, OS APIs

Built a desktop-based voice assistant designed to automate everyday workflows through voice commands. **Key Achievement:** Developed modules capable of launching development tools, performing web searches, and retrieving local system information through voice interaction.

CERTIFICATIONS & ACHIEVEMENTS

- HackerRank Frontend Developer (React) - [Verify Certificate](#)
- HackerRank JavaScript (Intermediate) - [Verify Certificate](#)
- HackerRank Python (Basic) - [Verify Certificate](#)
- HackerRank Python Level 3 Badge (Achieved an advanced Python problem-solving milestone)

EDUCATION

Matriculation (Computer Science) — The Spirit School

Batch: 2025–2027 (Ongoing) | Year: 2026
