Professional Summary

Passionate and motivated web developer with hands-on experience in React.js, Vue.js, Javascript and Typescript. Skilled in making responsive, modern and user-friendly web interfaces with a focus on building User Experience unforgettable. Experienced in building personal projects including dashboards, and portfolio websites. Quick learner with problem solving abilities and having many more interest in exploring terms like Cyber Security, Agentic AI and vibe coding.

Technical Skills

Languages: JavaScript, Typescript, CSS, Python (Basic Familiarity)

Frontend Development: React.js, Vue 3, Bootstrap, Tailwind.

Tools: Vs code, Cursor, Tare, GitHub, Pycharm.

Cloud Services: Netlify, Vercel, Infinity.

DevOps: Github Actions, CI/CD, Linux (Ubuntu, Parrot (Security) OS, Black Arch, kali).

Software Engineering: Git and Github, Debugging, Troubleshooting

Projects

1. Personal Portfolio, *Online presence of a Software developer*, [view here](#)

Project Brief: Developed a modern and fully responsive multi page personal portfolio website with a minimal look using Vue3 and Javascript. To showcase projects, Technical skills and learning behavior.

Solution: Implemented Interactive UI components, smooth navigation, dark-mode design and optimized layout.

Outcomes: Got an error free, fully responsive and professional portfolio to showcase skills, projects and Personal branding.

Module: Contact Page, Project showcase, Skills section, Responsive Navigation and Dark mode UIe.t.c.

2. Lyrics Generator, *AI-powered mood based lyrics generator*

Project Brief: Built an AI-Powered lyrics generator web application using React.js and Typescript and an Open Router open source and free for all API, also integrated by my-self.

Solution: Developed a responsive web application with real time content rendering and async. API integration.

Outcomes: Got a well-managed, secure and responsive web application with smooth content rendering and secure API calls.

Modules: Prompt input system, API integration, Responsive UI, lyrics display section, loading State Handling, dynamic content rendering

3. Python Voice Assistant, *Desktop Automation system*

Project brief: Developed a single file Python voice automation which is capable to get and proceed voice and text commands with unbelievable accuracy and speed. It can also fetch data about anything from Wikipedia. It works well on both windows and linux environments.

Solution: Implemented automation features for file and folder management, system control operation, Wikipedia information fetching, and voice command processing using Python libraries.

Outcomes: Built a light-weight and efficient voice assistant which automates 45-60% daily life tasks which are really time consuming such as closing unnecessary apps running in the background, user interaction through voice and Written inputs.

Modules: System Control, Voice recognition, File & Folder management, Huge number of commands to use, Power Off commands.

4. 2D Stickman Game, *Browser multiplayer fighting game*

Project brief: Developed a 2D stickman fighting game using HTML, CSS and JS featuring 10 playable, Boss fights and both single-player and local 2-player modes.

Solution: Implemented Character movement, attack mechanics, collision detection, level progression, responsive controls and cross-platform gameplay support for pc and mobile browsers.

Outcomes: Created a lightweight and interactive browser game with smooth gameplay experience, local multiplayer functionality and mobile friendly controls.

Modules: Single player mode, Boss fight system, 2-player mode, level progression, Health system, Keyboard & Touch controls and Special Attacks in Boss Fights.

5. SMS (School Management System), *full stack web application*

Project brief: Collaborated in a team of two developers to build a school management system using React, Bootstrap and PHP.

Solution: Contributed to frontend development, UI implementation, and project management while using an AI (Deep-seek) to help refine and optimize frontend and backend code structure.

Outcomes: Successfully developed a responsive and organized management platform with improved UI consistency, optimized workflows and smooth system performance.

Modules: Student Management, Teachers Dashboards, Attendance System, Academic Record Management, and a responsive admin panel.
